

# Introducing the **Hally Liner Recycling Program**

5 simple steps to reduce your waste to landfill and make a positive change for good!

**1**  **Join the Hally Liner Recycling Program.**  
Choose from our flexible shipping options.

**4**  **When you have filled your box.** Contact us and we will organise pick up or delivery to nearest depot.

**3**  **You start recycling!** Fill your box with liner that follows our **Recycling Rules**.

**2**  **We ship Hally approved liner box and pallet to you.**

**5**  **Hally confirms and invoices external freight costs.** If agreed, new liner box and pallet is delivered to you.

 **Liners are sent for recycling.** Liners are shipped on your behalf to one of our designated recycling facilities.

# Packaging Menu

A breakdown of the costs involved in our Liner Recycling Program.

\$40	<b>Hally Liner Box (recommended)</b> This is an approved heavy duty box and lid which has been designed to hold between 500kg and 1000kg of liner and to fit onto the approved export pallet
\$50	<b>Export Pallet (recommended)</b> This is the approved heat treated export pallet which has been designed to fit into a 20 foot container stacked 10 x 2
POA	<b>Packaging Delivery</b> One way delivery of empty Hally Liner Box and Pallet to client location
POA	<b>Pick Up Freight</b> One way return of full Hally Liner Box and Pallet from client to depot
\$60 per pallet	<b>Recycler Handling Fee</b> Consolidation of the returned glassine liner into the shipping container and completion of the export declaration for paper waste
\$0	<b>Coordination Fee</b> Coordination and administration provided by Hally

# Recycling Rules

White Glassine Liner only - no coloured, kraft or plastic liner

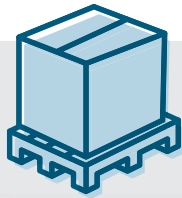

Liner must be free of labels, adhesive and plastic material

Liner must be clean, dry and free of contaminants

Liner is accepted loose or as tightly wound rolls, with or without cores

## Using your own packaging

### Box Specifications

We recommend you use the Hally Liner Box (HLB). The HLB has been designed for optimal stacking in the shipping container. There are strict requirements for the box:

- It must be stored on heat treated export grade pallets
- It must have a lid
- It must be maximum size 1.16m (L) x 1.16m (W) x 1.0m (H)
- It must not overhang the pallet
- The maximum height of a box stacked on pallet is 1.15m
- Filled box must be minimum of 500kg and maximum of 1,000kg
- Boxes must be strong enough to support double stacked

### Pallet Specifications

We recommend you use the Hally approved pallet. Non conforming pallets will require rework onto approved pallets which attracts additional costs. Pallet specifications are:

- Pallets must be heat treated (export grade - ISPM15)
- Pallet size for Australia
  - Minimum size 1.1m (L) x 1.1m (W)
  - Maximum size 1.16m (L) x 1.16m (W)
- Pallet size for New Zealand
  - Must be 1.0m (L) x 1.2 m (W)
